

June 27, 2017

We are pleased to announce that Laboratory Testing Inc. (LTI) of Hatfield, PA acquired Fracture Technology Associates (FTA) on June 27, 2017, after a long business relationship with the company and the founder of FTA, Keith Donald.

**Fracture mechanics testing services and FTA software systems will now be provided by LTI.**

Laboratory Testing is a family-run, independent Materials Testing and Metrology Lab serving a wide-range of industries, including aerospace, power, medical, military and commercial. The company has been in business since 1984, and currently has 175 employees and a 102,000 sq. ft. facility.

LTI is highly experienced in Fracture Mechanics, and provides Fatigue Crack Growth and Fracture Toughness Testing through its own Fracture Mechanics Department. The Lab is also well-versed in FTA software, with all of its 19 servo-hydraulic mechanical test frames operating with these software systems.

Construction of a new 2,225 sq. ft. Fracture Mechanics Lab is well under way at LTI with over twice the square footage of the present lab. The new lab will house LTI's current test frames and allow for the addition of FTA's 10 frames and staff within the next year. In the meantime, FTA's test frames will remain in operation at the facility in Bethlehem, Pennsylvania to provide additional capacity.

LTI plans to invest in ongoing software development to increase features and functions. The Lab will also enhance and expand service, support, and training.

Contact LTI at [800-219-9095](tel:800-219-9095) or [sales@labtesting.com](mailto:sales@labtesting.com) to get pricing or find out more about Fatigue Crack Growth Testing, Fracture Toughness Testing or Fracture Mechanics software systems.
