March 23, 2020

All,

Laboratory Testing Inc. (LTI) leadership continues to monitor developments around COVID-19 (coronavirus), to include local, state and federal directives and public health recommendations that are being communicated.

LTI performs critical testing and services, and provides test results and data vital and integral to a variety of critical life-sustaining industries and national infrastructure, including, but not limited to, energy / power generation (utilities), nuclear reactors, transportation systems, metals manufacturing, national defense, medical, and many others, as identified by Cybersecurity and Infrastructure Security Agency (CISA), The Department of Defense (DoD) / Homeland Security, and/or State Government.

As defined by the Department of Homeland Security, our work supporting the essential products and services required to meet national security commitments classifies LTI as an Essential Critical Infrastructure Workforce. As a result, we have a special responsibility to remain open and maintain our normal work schedule.

Our commitment has always been to provide timely and quality service. However, the safety and health of our customers and employees is of crucial importance at this time, and we are taking all recommended measures during this time to keep our employees safe. LTI will be open for normal business operations until officially directed otherwise by the appropriate Federal, State, and Local authorities.

Sincerely,

Brandon McVaugh
President
